#### About the Task Force on Climate-Related Financial Disclosures (TCFD)

TCFD, the "Task Force on Climate-related Financial Disclosures," was established by the Financial Stability Board following a request from the G20 to improve and increase reporting of climate-related financial information. TCFD released its final report in June 2017, which gives practical guidance on climate-related financial disclosures, and recommends public companies and other organizations to disclose climate-related risks and opportunities in four thematic areas that represent core elements of how organizations operate: governance, strategy, risk management, and metrics and targets.
