

## Obtained Third-party Assurance for Greenhouse Gas (GHG) Emissions

Skylark Holdings Co., Ltd. has obtained independent third-party assurance from the Japan Management Association for its GHG emissions (Scope 1, Scope 2 and Scope 3 Category 1) in 2022 to ensure the reliability of its environmental data.

We will continue to promote efforts to achieve our mid- and long-term targets for GHG emissions: 50.4% reduction in Scope 1 and 2 in 2030, 30% reduction in Scope 3 (both compared to 2018 levels), and virtually zero emissions in 2050, thereby contributing to the realization of a decarbonized society.
