Skylark Holdings Co., Ltd.

[First Among Japanese Foodservice Companies] TNFD Report Issued, Assessing Risks and Opportunities for Natural Capital

Skylark Holdings Co., Ltd. has become the first Japanese foodservice company to publish a TNFD Report based on the "TNFD Final Recommendations v1.0," the international framework for disclosing nature-related information recommended by the Taskforce on Nature-related Financial Disclosures (hereinafter, "TNFD").

As our business is heavily dependent on the blessings of natural capital—including plants, animals, air, water, and soil—we have positioned climate change, water resource conservation, and biodiversity as key priorities within our ESG strategy.

The report analyzes the relationship between our company and natural capital, following the approach recommended by the TNFD. Based on the insights gained from this analysis, we will promote appropriate responses to natural capital and further disclosure of relevant information.
